Gleichen to Hold a Stampede on June 27

On Wednesday, June 27th, the first Stampede staged at Gleichen for some years will be put on at the fair ground's and will be known as Gleichen's First Round-up. All who attend can rest assured that they will get all the thrills they want. The program that will be put on during the afternoon will be an extensive one and in order to complete all the events there will not be an idle moment during the whole afternoon.

The Life of the Late Dr. John McAlpine

Following is an article, written by G. E. Hall, of the Banting Institute, Toronto. The paper was read by Mr. Hall at general meeting of the Academy of Medicine, held some time ago in Toronto. The same time-antiquated medical instruments, diplomas, old account books and photographs belonging to the late Dr. John McAlpine, of Lindsay, were presented to the museum of the Academy. The late Dr. John McAlpine was the great, great-grandfather of Mrs. C. Hepburn of Mossleigh. Following is the article:

This is a short account of Dr. John McAlpine, who graduated from Victoria College, Cobourg, in 1875. I do not know just when the McAlpine family first came to Canada, but a branch of this old Scottish clan was well established in Ontario before 1800.

In tracing the history of Dr. John McAlpine, the following story of his grandfather, told by Peter McArthur, was found in a volume of early Canadian prose and verse.

"This is the story of Neil McAlpine of Fingal, the pioneer patriot who saved the Talbot Settlement when it was threatened by famine. It was my privilege to hear it told by Neil McAlpine's grandson, Dr. Hugh A. McAlpine. It was told in a pioneer house such as Neil McAlpine knew, and I only wish that I could tell it to-day so that it would thrill you as it thrilled me. My version is only an echo of that splendid telling, but I am giving it because the hope of Canada and the Empire and possibly of humanity, lies in such men as Neil McAlpine. "Neil McAlpine was one of the early settlers in the neighborhood of Fingal. Being a man of means, he farmed some wheat extensively for those days and when market prices did not suit him, he was in a position to hold his products until another season.

One year the frost killed all the wheat in the Talbot Settlement. Neil McAlpine had a thousand bushels in his granary. At first he excused it in the prospects of selling the wheat profitably, but one day when he was

Buffalo Hill News

Mr. J. K. Goldthorpe arrived from Breton a week ago and is, at present, staying with his son, John Robert, and renewing acquaintances. He intends to ship a car load of effects from Armada as soon as he can make the necessary arrangements. He reports plenty of moisture and that crops are looking fine in the North.

Murray Douglas, the eldest son of Mr. and Mrs. James Douglas, who are operating the Phelan estate farm, was taken to the Vulcan Hospital last Monday evening, suffering with appendicitis and will likely be operated on immediately. We hope he has a quick recovery.

In St. Thomas he suddenly saw things in a new light. Word was brought to him that the local miller wished to see him. When he went to the mill, the miller said: "You have some seed wheat, haven't you?" "I have three thousand bushels," the miller made him an offer which startled him. "Why," he exclaimed, "that is more than you can get for it after it has been ground into flour. What are you going to do with the wheat?" "I am going to sell it to the farmers for seed grain."

It dawned on Neil McAlpine what that would mean, and as he told about it afterwards, the cold sweat broke out on him. His grain might be used to extract blood-money from the struggling settlers who were threatened with famine. His mind was made up at once. He hurried home and developed his plan. The next day, being the Sabbath, and he being an Elder of the Kirk, he dressed and went to church early. Standing beside the gate he whispered to each pioneer as he passed through: "You can get seed grain at my place—bushel for bushel. For each bushel you take at seed time you will bring back one bushel after harvest."

He made this offer to every member of the Presbyterian Church. When he went home after service he remembered that he had made his offer only to the Presbyterians. In the settlement there were many people belonging to the other churches, so he put his sons on horse-back and sent them to the others—the Baptists, Anglicans, Roman Catholics and Methodists. A young man stood by the gate of each church and whispered to the worshippers as they entered: "You can get seed wheat from my father—bushel for bushel. For each bushel you take now, you will bring back one bushel after harvest."

On Monday morning the settlers thronged to Neil McAlpine's. The boys were in the

(Continued on page 4)

Mossleigh's Field Day Sports on Wed., June 20th

Mossleigh will hold its fourth annual Field Day on Wed., June 20th. A good program of races, baseball, softball and basketball has been arranged. Admission to grounds 50c, children free. The day's sports will be brought to a close by a dance held in the evening, music by the Pirates Orchestra. Admission to dance, Gents 50c, supper 25c.

Dry Cleaning Demonstration June 19th

The U.F.W.A. held its regular meeting at the home of Mrs. J. Mason on Wednesday afternoon with 12 members and 1 visitor present. The meeting opened by repeating the creed. A report on the district convention was received.

It was arranged to hold an all-day demonstration of dry cleaning by Miss McIntyre of Olds Agricultural School on Tuesday, June 19th. This demonstration will commence at 10 a.m. All ladies of the town and district are cordially invited to attend and are requested to bring a pencil and paper in order to take notes. A covered lunch will be served at noon and ladies are asked to bring baskets.

Mrs. Shatto gave a very interesting paper on "Capitalism Creates Millionaires." The Berrywater local sent an invitation for Arrowwood local to meet with them on June 21st. All members are asked to try and be there.

The regular meeting of June 20th has been postponed until June 27th and will be held at the home of Mrs. H. Brown.

A delicious lunch was served by the hostess, assisted by Mrs. D. House and Mrs. M. Norton.

Church of the Brethren Note

Rev. W. C. Lyle will speak at the Church of the Brethren next Sunday morning, at 11:30. Be sure to be on hand for Sunday School at 11:30.

Sunday evening at 8 o'clock, the young people will give a varied program. We feel sure there is a treat in store for all of us. We urge you to come for your own good, and for the encouragement it will be to the young people to have a large audience.

Sunday evening, June 24th, the church will have as its guests, the Guides and Brownie organizations of our community. There will be some special features beside an address.

This church will have the privilege of entertaining the District Conference of the Brethren Churches of Western Canada, on July 17-20. Prof. A. F. Brightbill, of Bethany Biblical Seminary, Chicago, Ill., is to be the guest speaker. Prof. Brightbill is the head of the Music Department of the Seminary, is not only a wonderful chorus and choir director but a fine speaker as well.

The young people are arranging for a camp to be held at the Bow River, July 13-17, previous to the District Conference. Prof. Brightbill will have

A Co-operative Vacation School Will Be Held Here

Rev. R. W. Hibbert, of Calgary, Executive Secretary of the Religious Education Council of Alberta, met with a small group of workers, representing the United and Brethren Churches, at the Church of the Brethren on Monday evening.

Rev. Mr. Perry, of Milo, was also present. Arrangements were made to hold a co-operative Vacation School, July 3-13.

Children from four to fourteen years are eligible to attend.

We feel that this school should be fully supported by the people of the community. The purpose is to give the children additional Bible instruction to that which is given in the Sunday School, and to interpret the religious teachings in terms of Christian character and conduct.

Milo Notes

Mrs. McDonald of High River was a visitor on Sunday at the home of her parents, Mr. and Mrs. Martin Peterson.

Mr. Hoffman, of Lethbridge, is spending a few weeks with his daughter, Mrs. H. Nelson.

Mrs. J. Martin was hostess to a farewell party on Sunday evening in honor of Mrs. Beechman and her mother, who left on Monday for a trip to Eastern Ontario.

Mrs. A. Alston's mother and sister, Miss Gooch, arrived on Saturday from Chicago, where they reside. They will spend a short visit here.

The grasshopper station in full swing again. According to all reports, the hoppers are very busy in this district, and are the farmers' head and neck poison bran and distributing it.

Baptist Church services every Sunday at 11 a.m., with Mr. Smith in the pulpit.

United Church services every Sunday. Sunday School at 7:15 p.m. and church service at 8:00 p.m. The choir has been re-organized, with Mrs. P. H. Coleman as director and organist. Special singing Sunday the 17th. The male quartet will give a selection, also a special number by the choir. Choir practice every Thursday evening at 8:15 in the church.

Friends of Mrs. A. Ferngrin will be glad to hear that she is recovering and will soon be around again after a bad attack of flu.

Mr. and Mrs. G. Palfrey left today for Blackie, where they will reside.

A dance sponsored by Cully's orchestra will be held on Saturday the 16th, in Larsen's Hall.

charge of the camp. Because he has had much camp experience and is an enthusiastic, energetic young man we feel sure the young people will have a wonderful camp.

Arrowwood Notes

Mr. W. C. Lyle was a visitor to Gleichen last Monday.

FOR SALE—Singer Portable Electric Sewing Machine \$35 cash. Apply Resource Office.

Born—To Mr. and Mrs. Aaron Royer, on Tuesday, June 12th, a son.

The Community Club is arranging for a lawn social on Friday, July 6th, at the home of Mrs. A. A. Cliflard.

Mr. Perry, who is in charge of the Milo Queenstown United Church circuit, was a visitor in Arrowwood Monday evening.

Beginning next Sunday, June 17th, Rev. V. M. Gilbert will preach at Cluny at 10:00 a.m. and here at 11:45 a.m. as usual.

The Masons are holding their annual church service on Sunday, June 24th, in the United Church, Gleichen, at 3:00 p.m.

Mr. E. Ross of the Bank of Nova Scotia staff returned last Tuesday from a holiday spent at his home in Scotland.

Mr. A. S. Abel, principal of the Queenstown School was a visitor in Arrowwood on Monday evening.

Mr. and Mrs. N. J. Lord and family spent Sunday at the home of Mrs. Sawyer at Gleichen. They were accompanied home by Audrey Sawyer.

Miss Lillian Archambault of the Ensign district, has accepted a position at the Vulcan Municipal Hospital—Vulcan Advocate.

Mr. and Mrs. W. M. Barriars, accompanied by Mrs. Q. Hollenberg, Miss Thelma Miller and Mrs. John Wisniet motored to Calgary on Tuesday.

"I cover the Waterfront" is the feature of the picture show on Thursday—The year's most surprising film. Also the 7th episode, "Phantom of the Air" and a comedy.

Mr. and Mrs. A. L. Ingraham were visitors to Calgary on Wednesday. They were accompanied by Miss Verna Ingraham who returned to her nursing duties in the Holy Cross Hospital after spending her holidays here.

Mr. M. G. Sanford and son, of Champion, with their race horse, "Roan Jacket", stopped at the Ellis home Tuesday, June 12th, on their way to Drumheller. They plan to attend the horse races in Drumheller on June 18th and 14th and will stop at Arrowwood again on their way home Thursday night.

Tuesday, June 19th—See Leomond play ball at Arrowwood, 5:30 p.m.

Arrowwood Seniors again collected a victory by defeating Queenstown 10-9 at the eastern town Wednesday night.

Service will be held in the Arrowwood Roman Catholic Church next Sunday at 9 a.m.

All ladies are requested to attend the dry cleaning demonstration on June 19th.

Mr. Malcolm Taylor arrived home Saturday from Calgary where he has been attending Normal School.

An all-day dry cleaning demonstration, arranged by the U.F.W.A., will be held in the Ingraham Building on Tuesday, June 18th.

Rev. H. W. Hibbert, M.A., B.D., Secretary of the Religious Education Council of Alberta, was a visitor to Arrowwood on Monday evening.

Mr. E. Larson, of the local branch of the Bank of Nova Scotia at R.R., is spending his holidays at his home in Weldon, Sask.

We regret to hear that Mr. R. H. Anderson is not able to leave the hospital yet. Last Wednesday it was found necessary for him to undergo a second operation.

The staff of the Eventide Home at Gleichen are conducting twilight song services on the main street. These services will continue each Sunday evening until the middle of July. The public is invited to be present and to join in the singing of the old well-known hymns.

Last Friday evening, June 8, twenty-nine boys and girls of the Brethren Intermediate Sunday School classes met at the home of Mr. and Mrs. S. M. Berger, for a party, as a result of the contest. Games were continued in the house. A dainty lunch was served which brought to a close, a very enjoyable evening.

The last meeting of the Arrowwood Alter Society was held at the home of Mrs. E. E. Jacques, when eleven members were present. The meeting was opened by singing "Mother Dear, Oh Pray for Me." During the business of the meeting, it was decided to hold the annual picnic on June 24th. Lunch was served by Mrs. Hanson and Mrs. Journey. The next meeting will be held at the home of Mrs. J. Rainville.

"Fresh from the Gardens"

That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Western Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase."

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper despatches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is mooted in the federal parliament, some member from one of the older provinces, impelled by this idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole, for works, projects and purposes which may be construed as exclusively Eastern. Forgotten is the use made of the resources of the West in the building of the transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the East. Forgotten, too, is the fact that the West's present needs are due to the dire extremity of many of its people, and that they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendency. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers", draining, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older, Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson's Bay Company, which conferred upon that company "rights in the vast territories lying to the westward, draining into the Hudson Bay"—including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter by the Hudson's Bay Company. The British Government agreed to the request on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company proceeded for two years, during which time it held out for a cash payment of \$300,000 (approximately \$1,500,000, as one of the terms under which it was prepared to relinquish its rights in the territory. The Canadian Government, then representing the original provinces of Confederation, borrowed the required sum on bond issues which matured in 1904. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, ever and anon, during debate in the federal parliament.

Obviously, \$1,500,000 is a ridiculously small sum against which to assess a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculously small not only in proportion to the wealth produced normally each year in the far-flung wheat fields of the West. It is ridiculously small not only in proportion to the contribution made by the "purchased" territories to the aggregate wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenue of Canada. The idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the prairie to their extremity, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East holding the West in fee, the reverse is closer to the truth.

Italy To Build Battleships

Three Large Fighting Ships To Be Built Under Washington Treaty

Italy will construct three large battleships, with general specifications similar to those of the French battleship Duquesne, it was disclosed by naval officials.

The new vessels will be completed by 1940 and will cost about \$85,000,000. Their construction will be part of a program outlined by Premier Mussolini in an address before the chamber in which he stated that Italy proposes to utilize the 70,000 tons allowed Italy under the Washington Treaty.

The premier estimated the expenditure will total 1,000,000,000 lire. This capital expenditure as long as possible, in addition to appropriations to modernize old battleships between now and 1940.

Life-Saving Ducks

Rallied Round Companion And Rescued It From Mud-Turtle

Many birds have a lot more sense than people give them credit for, according to a man from Minnesota. He tells, for instance, that last year he saw a lot of his ducks in a huddle in the middle of the little bay on his farm. They were setting up such a clatter that he took a rowboat and went out to see what was in the centre of the huddle was a duck more than half under water being dragged down by a huge mud turtle that had it by the foot. The other ducks were pressed so close to they could get in an effort to hold the duck up, but in vain, meanwhile sending out distress calls as best they could. A rescue was effected and the ducks disbanded.

Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. It is only wonder she becomes nervous and irritable, has hot flashes, faint dizzy spells, shortness of breath, nervous aching and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's E. & F. Pills a remedy to strengthen the system and bring back the good strong health.

MILBURN'S
HEALTH
NERVE PILLS

World's Largest Flying Boats

Russia Leads With Britain Second And United States Third

Like everything else airplanes are becoming larger and more powerful. The honor of having the biggest goes to Russia.

The Russians have almost completed at Moscow a flying boat—it might be called a flying liner—to be named the "Maksim Korviki." It will provide accommodation for 70 passengers, and will have a crew of six. It will have a moving picture "auditorium," and a room for developing photographs. The pilot will sit in a conning tower above the wings so that he will have an uninterrupted view.

Great Britain furnishes the second largest, the "Sylia," which is almost ready. It will carry 39 passengers and a crew of five. Among other things it will have a smoking compartment.

The United States comes third with the S-5 built at Bridgeport, Conn., by the Sikorsky Company. It carries 32 passengers and a crew of five. It has a full-load range of 1,200 miles non-stop, and can also carry 1,000 pounds of freight.—St. Thomas Times-Journal.

"PERSONS NOT FAT LIVE LONGEST"

Eminent Physician Declares

In a recent lecture before the American Academy of Medicine, a prominent physician stated that persons who are fat live the longest.

A common sense confirms this. Insurance companies often charge overweight folk a lower rate of premium than on account of the risk. Fat crowds and weakens body organs—keeps them down and puts unnecessary strain on the heart. A host of ailments, such as heart disease, (shortness of breath and lameness) are often associated with fat.

So get rid of this dangerous, unhealthy fat. There's no reason why you should. It's a simple matter. Take this safe, effective treatment—a half teaspoonful of Kruschen Salt in a glass of hot water first thing every morning.

It's a healthy "little daily dose" of Kruschen keeps the system free from harmful toxins, it helps to re-establish normal and proper body functioning—so you're feeling fine and fit all the time. Regular activity takes the place of sluggish indolence. Eat what you want and gradually and without discomfort.

Vaccine For Tuberculosis

New Preparation Being Tested On Cattle In Ireland

Experiments to find a cure for tuberculosis in cattle commenced in various parts of the world. The Spanish vaccine, of which much was heard two or three years ago, has been found to be ineffective. A recent one of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spanish vaccine have survived the infection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a national campaign to clean up its dairy herds, the introduction of a vaccine to eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunizing dairy cattle against tuberculosis and gradually ridding the country of a scourge which is costly to public health and farmers.

Dwarfs Holding Congress

Likely To Take Place In Budapest Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary are forming a National Dwarf League. Hungarian Dwarfs have invited all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year.

Their creed is to "preserve the purity of the dwarf race," to forbid marriage with normal-sized people and to demand lower fares and smaller houses for all tiny folk. Their leader, Hitler, is said to be 30 inches tall.

Invention For Radio Fans

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio broadcasting industry. He calls it the "televisor" and by use of this instrument, a listener-in on a broadcast can, by pressing a button, immediately transmit to the broadcaster his reaction to the program being presented.

All tree squirrels make nests of twigs and leaves among tree branches.

Fulfilling Father's Hopes

Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

The last letter he wrote was to his wife. He spoke of their infant son Peter. "Make the boy interested in natural history if you can," he said. "It is far better than games."

Peter Scott is 24 now. He has fulfilled his father's hopes. Recently he opened in Bond Street, London, his second exhibition of paintings of bird life.

The grey light of dawn is there; so are the mudflats, the ebb and flow creeks, the ebb of the tide, and eerie, plaintive noises. The curlew calls; you can hear the piping of soot-bellied redshank and stint. Grey geese rise V-shaped into the sky and flight shoreward to the fresh marshes of the mainland.

It is a world of thrills to the mere wildflower. It is a world of exquisite joy to the wildflower-naturalist, who is what Peter Scott has become.

He shoots little now, as he said recently, but night and day, he goes through, lies in a scope-out hole in the Waah, or huddles in a pit in the salt marshes, waiting to catch the fleeting visions he has captured in paint.

The Grasshopper Campaigns

Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion Entomologist.

Published in the 1932 summary of insect outbreaks of that year states with reference to grasshoppers that control campaigns involving the use of poisoned baits were actively carried out in most areas, and, despite many difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops. In July and August, extensive dispersal flights of grasshopper swarms were reported from the infested region. As a result, practically all of the open prairie land of the three Prairie provinces is now infested.

It is expected that during 1934 the outbreak will be even more intense and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

Dredging For Gold

Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pek on the Jugoslav-Rumanian border, on the bed of which has been collecting for more than 2,000 years. Up this river sailed Sargon and his Argonauts from the Black Sea, and the golden fishes of their quest is no legend today, for the peasants of the Pek River Valley steep shepherds in the ground and after a few weeks pull out golden fleeces, the alluvial gold brought down from the mountains by the water having settled in the bed.

It was here that Alexander found all the gold for his expedition in 328 B.C. Firms of many nations have made bids to supply the dredging machinery and the operations are expected to be extensive.

A Closely Guarded Secret

Germany is closely guarding its experiments with radio-controlled airplanes. It is reported that successful flights were made by a machine only slightly larger than a dirigible being entirely by radio. The tests were made under greatest secrecy, and officials refuse to divulge any information.

"Too bad about Jane and the man she's engaged to. Neither one of them is good enough for the other. Where did you get that idea?"

"I've been talking the matter over with both families."

The world is wide, but there are lots of narrow people in it.

Still Works At Ninety

Blacksmith Not Idle Even If Son Runs Business

Partnership of Kemp and Son, village blacksmiths at Worthington, England, has been, to quote the official notice, "dissolved by mutual consent," but a man who worked hard as a blacksmith even in his ninetieth year will not be altogether idle. It was not lack of business that caused the firm to dissolve. Far from it, but simply that Samuel Kemp was 90 and came to the opinion that his boy, James, was old enough to carry on. Samuel Kemp, however, does not intend to retire, "because," he says, "you can't trust these boys." He has finished 78 years continuous work at the forge. Up to the time the official notice of the dissolved partnership was published he used a sledge hammer. Next day he was soldering kettles.

Canada's Agricultural Revenue

Decrease Last Year Of Four Percent

The total gross agricultural revenue of Canada for 1933 is estimated at \$762,300,000 as compared with revised estimates of \$768,774,000 for 1932, and \$836,114,000 for 1931. This represents a decrease of \$4,492,000, or 0.6 per cent, from 1932. There are increases in the revenue from farm animals, wool, dairy products, fur farming, home, clover, and grass seed, and decreases in the revenue from field crops, fruits and vegetables, poultry and eggs, maple products, tobacco, and fax fibre. The greatest increases are from farm animals and dairy products, while the biggest decreases in revenue are shown in field crops and poultry and eggs.

Greatly Increased Riches

Higher Gold Price Made Big Difference To Indian Prince

It is due largely to President Roosevelt that an Indian prince, the Nizam of Hyderabad, is much richer than he was a year ago. Locked up in his strong-room is a vast store of gold in coin and bullion. Early last year its value was estimated at \$500,000,000. Since then the price of gold has increased about 60 per cent, as a result of the action of the United States in raising a higher price for gold. The Nizam's hoard is now estimated worth \$800,000,000.

Has Regular Zoo

Pity the prowler who breaks into the room of Kenneth Johnson, University of California student. Johnson, who aspires to be a zoo keeper, keeps eight snakes, a black widow spider, and a Gila monster in his bedroom. Johnson studies the best way to make them happy, and improve their intelligence by running them through mazes.

Good Friend To Horses

When Policeman M. Elwood prosecuted John Hill, a grocer, for cruelty to a pony it made the 1031st equine he had befriended in court. Elwood has been on the London force for 30 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

Dreams Of A Startling Future

Nicola Tesla On Verge Of Announcing New Discoveries

It is all very hazy, of course, but when Nicola Tesla says he "is on the verge of announcing a new invention of incalculable benefit to the world," the world is warranted in sitting up and taking notice. For the wonders that Tesla has performed in the past are to be considered as an indication of the wonders he may perform in the future. The Italian genius says he is prepared to startle the world with four new inventions which are likely to provide him with many millions. With these millions he will proceed to put some of his earlier discoveries on a commercial basis. Chief among these, we take it, he rates the transmission of power by wireless. And, of course, that would be to put some of his earlier discoveries on a commercial basis. Chief among these, we take it, he rates the transmission of power by wireless. And, of course, that would be to put some of his earlier discoveries on a commercial basis.

Belgium Looking To

Her National Defence

Add Belgium to the list of countries, large and small, which have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defence which shall be adopted. Within the past year and a half this small power has spent no less than \$20,000,000 defending its German border.

Joins Countries Who Have Given Up

Disarmament Idea

Add Belgium to the list of countries, large and small, which have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defence which shall be adopted. Within the past year and a half this small power has spent no less than \$20,000,000 defending its German border.

Baseball Notes

The local senior baseball team proved their superiority again when they defeated the Champlain Elks on the local diamond 187 Monday evening. Fred Miller performed on the mound for the Arrowwood boys and there is no doubt that Fred's baseball career is far from history yet. The Champlain boys were baffled consistently and ten were retired via the strikeout route.

On the evenings performance there were many errors made by both sides, but the visitors errors were of a more crucial nature. The Arrowwood boys hit well, which accounted for the number of runs. Melvin Bowman again had a big night at bat nailing four hits out of six, one being a home run. Sharpe's single in the sixth was well hit and was good enough for a home run when Anderson made an error in left field.

The Champion team were short several regulars yet such seasoned ball players as Hamilton, Bouzayan and Anderson gave favorable accounts of their ability. The local team are developing into a snappy baseball team and you owe the boys your support. Be on hand Tuesday evening next and see Arrowwood and Lomax try conclusions.

The Life of the Late Dr. John McAlpine

(Continued from page 1)

grainy morning out the wheat and filling the bags, as each settler with his precious store of seed grain came past the house, Neil McAlpine he was called Captain. Storms would hold up his hand and ask "How many bushels?" When he was told the amount he would add, "Remember now, bushel for bushel. For every bushel you are taking you are to bring me back a bushel after harvest."

For three days the procession passed Neil McAlpine's door to the granary and back until the grain was distributed and every family in the settlement had seed wheat. This great social act accomplished the good man's purpose, and to this day there are old people in the neighborhood of Fingal who are saying, "It happened so many years after or before Neil McAlpine saved the settlement."

The story continues about an Irish family which had been helped by Neil McAlpine many times. A man speaking to the Irishman about the famine said, "You were Catholics were you not? We were." "But Neil McAlpine was a Presbyterian," drawing himself up to his full height, the Irishman replied: "On Sundays he was a Presbyterian, but on week days he was a neighbor."

The spirit of comradeship, good will, philanthropy and leadership developed in the clan leaders years ago, has been one of the outstanding characters of the McAlpine family.

In 1830, Malcolm McAlpine, one of the sons of the great Neil, settled just south of the "Long Woods" road, in Middlesex County. At this time, the nearest cabin was nine miles distant. The whole country was a dense bush, with deer tracks and Indian trails the only roads. The best means of communication was the canoe route afforded by the River Thames. Malcolm, like his father, had for years to carry bags of wheat on his back to Killworth, to be ground.

To us today it is very hard to realize that less than one hundred years ago the County of Middlesex was wilderness as unbroken as in the seventh century. Here these hardy Highlanders first made the conquest of the forest, and began the building of a community, now the garden of Ontario.

Having settled on his one hundred acres on the "Long Woods" road, which was opened in 1812, Malcolm McAlpine began clearing out his farm from the unbroken forest. In 1817 he married Ann, the daughter of Hugh McAlpine, a very distant relation. Malcolm's people were known as the "Long Wood" and his wife's as the "Bear Creek" McAlpines. At this time there were 107 settlers in the township and the total taxes amounted to 7 pounds, 13 shillings. The early records of Middlesex County show that the McAlpines have rendered valuable public service in many capacities. Malcolm was a Captain at the time of the Fenian Raid.

On Dec. 10th, 1850, in Elfrid Township, near Appin, in Middlesex County, Malcolm's son,

John, was born, a sturdy son of pioneer parents. He began his education at the log school house that stood on No. 12 side road on the "Long Woods" road and later attended the Warville High School. In his holidays John worked on his father's farm, and learned the hardships of pioneer farming. Throughout his early life, John spoke only Gaelic. It was not until he was 12 years of age that he learned to speak English.

Following in the footsteps of his uncle, Dr. R. S. McAlpine, John's ambition in life was to become a practising physician and surgeon in a country community where he would be of the most use. To better accomplish his aims, he became a clerk in a Glencoe drug store, before entering college. He graduated in a class of ten from Victoria College, Cobourg as an M.D. in 1875 and in the same year graduated from Toronto University, with an M.B.

Immediately after graduation interned at the Toronto General Hospital, for one and a half years, receiving his hospital diploma in 1876. While there, he contracted smallpox and claimed to be the last of the only smallpox patient ever kept at the General Hospital.

During his college course, he spent his summers studying with Dr. Montgomery, of Glencoe, who was practising at Blackstock, in Durham County. Immediately after graduation he took over Dr. Montgomery's practice temporarily, and one year later moved to the village of Lindsay, fifteen miles from Lindsay.

Many people have told me that while practising at Janetville, as many as fifty buggies would be lined up in front of his house, waiting for an opportunity to consult the doctor. While at Janetville he married Eliza Hughes, daughter of John Hughes, of Cartright Township and shortly afterwards moved to Lindsay.

Exemplifying the spirit of the "Long Woods" McAlpines, he soon became the patriarch of the community and an integral part of every family.

Although only one of the several doctors in and about Lindsay, Dr. McAlpine's practice took him over the whole of Victoria and Haliburton counties, south into Durham County, north-west into Peterborough County, and north-west into Ontario County, an eloquent testimony to his reputation.

In the early days he had to make professional calls on horse back, carrying his medical equipment in his saddlebags. These were the days when only the large cities had hospitals. His operations were performed on the kitchen tables in the farm houses. His instruments and towels, etc., were placed in a cloth suspended in a wash boiler and then steamed. Sometimes the patient was taken to the doctor's home in Lindsay, operated on and nursed for weeks. His accounts, when rendered, were in early days usually 50c, \$1, 75c and perhaps \$1.50 for a 15-mile call in the winter. His payment might be a bushel of oats or a bag of potatoes. For a complicated operation he has received a goose. For a call to a family, about 25-miles away, to perform one of the first appendectomies, over 40 years ago,

he received a quarter of lamb.

His practice was not a business. It was his life. If a family could not pay, that did not prevent them from calling him again. There are on his records today, outstanding accounts of 30 and 40 years ago. His house was home, office, hospital, dispensary and the local centre of politics.

Dr. McAlpine, owing to the complexity of the individual, he lived in using any treatment which would improve the patient's condition. Some of his cures for hysteria were remarkable and amusing. He had a born clinical instinct, and his powers of diagnosing were almost uncanny. Dr. H. B. Anderson has said, "He was a man of outstanding practical clinical ability. Without the aid of modern instruments, he had a natural power of diagnosing, surpassed by few even today, which created for him a reputation throughout Ontario."

When hospitals were established, he sometimes paid the hospital charges for his patients and overlooked fees to such an extent that, although he had a most extensive practice, his income was very modest. My grandfather knew him well and has said that every one throughout the country knew him and every one was his friend—"One of the best doctors and one of the most kind-hearted men I have known." He was Lindsay's first medical officer, an office he held until his death, on December 6, 1925.

He was very fond of horses, and in his younger days kept a fine stable of good drivers. He

liked dancing the Scottish reels, was a fine tennis player, loved his home, his Scotch and a good game of whist. "He was a Presbyterian and a staunch Conservative. Dr. McAlpine has been described as the perfect type of family doctor of bygone years, now almost extinct. One could not help but trust him. It was impossible not to like him and to appreciate his essential qualities."

His reputation has stood the wear and tear of fifty years of practice in Lindsay and the surrounding country. Although seventy-five when he died, he was still in practically full possession of his mental and physical vigor, on the 30 day and night, always ready to help; the county patriarch, the family counsel, a friend alike to rich and poor.

Going Good

The Arrowwood ball team is giving a good account of itself and we are all proud of our local team. A good ball team such as we now have does more than any other sport to help put a town on the map, and every one who can should lend their support to the local team.

The recent rains bring the pleasant thought, to the mind that you may be able to purchase that extra piece of equipment that you have been wanting and badly in need of.

If it's the maximum power that you will be needing, we will be only too glad to tell you the reasons why you should own a model "L" Case tractor.

There is no better recommendation for a power plant than a satisfied user, with previous years of experience. Messrs. L. H. Irwin and Walter Steiner are recent owners and operators of the New Case tractor. It will be worth your while to watch the performance of these tractors if you are thinking of new power for your work.

It may be summerfall tilling tools you need.

We are rapidly approaching the harvest season and it's none too early to be thinking over what you are going to need in these lines.

First Motor Cop: Did you get his number?

Second Ditor: No, he was too fast for me. That was a mighty pretty girl he had with him.
